Sri Lanka Journal of Economics, Statistics and Information Management

Aims and Scope

Sri Lanka Journal of Economics, Statistics and Information Management is an international open-access, peer-reviewed and refereed journal which is published by the Department of Economics and Statistics, Faculty of Social Sciences and Languages, Sabaragamuwa University of Sri Lanka. The journal provides academics, researchers, and professionals with a platform to share the latest developments and advances in Economics, Statistics, and Information Management.

The journal attracts submissions from scholars focusing upon theoretical, empirical, policy, and practitioner issues within the fields of Economics, Statistics, and Information Management. The journal's contents reflect its integrative approach including primary research articles, discussion of current issues, empirical studies, literature reviews, case studies, conceptual models, reports, and book reviews.

All articles in this journal are subject to a rigorous blind peeroreview process initially, and are then reviewed by the editorial committee prior to final acceptance for publication.

Sri Lanka Journal of Economics, Statistics and Information Management

EDITORIAL NOTE

The Sri Lanka Journal of Economics, Statistics and Information Management (SLJESIM) is proud to announce the publication of its inaugural issue. One of the key objectives of SLJESIM is to promote publication from different streams of research that help enrich future the discourse on Economics, Statistics and Information Management. As Journals are inevitable scientific communication channel for academic and research institutions, the SLJESIM is a double-blind peer-reviewed open access, published three times per year by the Department of Economics and Statistics, Faculty of Social Sciences and Languages, SUSL. The journal accommodates three types of papers; review papers, conceptual papers and empirical papers that employ quantitative, qualitative and /or mixed methods approaches. Review papers provide critical and concise yet comprehensive and contemporary review of a particular theme specific to Economics, Statistics and Information Management.

This inaugural issue owes a great deal to many people. Especially, acknowledgement is due first to the Accelerating Higher Education Expansion and development (AHEAD) project for allocating funds under the activity five of the AHEAD/RA2/ELTA/ELSE/SUSL/SSL/OVAA/30 to develop collaborative research culture among local and international researchers. Thanks are also due to the editorial Board that drew up the parameters of the journal enabling to publish scholarly work as well as to the Coordinating Editor for popularizing the journal and accelerating the review process. Moreover, it is also acknowledged the service of the Text-Editor who has so generously given his time and expertise for editing and proof reading. Most of all, thanks must be expressed to all the reviewers for their professionalism and attention to detail which made seeing this issue into “print” a real pleasure. On this momentous occasion, I would like to extend my sincere gratitude to all the authors for their valuable contribution through research articles. Best wishes and thank you in advance for your contribution to the journal.
