ABSTRACT

An automated system for Students' Profile is developed in order to computerize the operations of the Students Registration of BA (General) External Degree Program of the Sabaragamuwa University of Sri Lanka.

       Periodical Registration
       Personal File Maintenance

Major aspects of the new system;

       Relational database for data entry, modifications, editing
       Query facilities of finding relational details of students
       Reports
              Students' Personal Details
              Students' Registration
              Course Details

       System Charts

(In addition to the above I have already did a program using Microsoft Access Package, from which also user can access any information about the students of the External Degree Program.)
