INTRODUCTION

This project is about the Sri Lankan Apparel Industry. I used HTML language and application of Front Page to design this publishing project. Further it is very helpful^{that} the knowledge on the work with Internet and its applications, during our visit to the university of Ruhuna.

To create this project basically I used the application of Front Page. When we use this application we can use various type of navigation structure. It made easy to create this project.

Furthermore, to make colorful and attractive my project I used various packages and applications such as, the Micro Media Flash 5, JAVA, Script, Dynamic HTML effect, Photo Draw, Photo editor, 3 D Xara, Marquee, Hover buttons, Banner bars, Multi media sound, Theme, Page transition, scanned pictures, colorful images etc.

I included various type of charts, graphs, tables, using Microsoft Excel and Power Point applications.

According to my topic I divided this web site mainlyⁱⁿ to 8 pages. These are Introduction, Importance, History, Distribution, contribution, Problems, Future and Association.
