INTRODUCTION

As the year III semester I students we were asked to design a web site as a part about the degree of Bachelor of Art. Therefore as the topic for my web site I have selected “Japanese Foods”, which gives more details about this International Food.

All are know about western and Chinese foods. Japanese foods are very complicated to prepare. So most of people are don't know about Japanese Foods. However, if someone sees my web page he/she can improve his or her knowledge.

W.W.W - In 1994 – just seven years ago – that World Wide Web, a little known Internet communication system based on hypertext principles, began to attract notice. Since then the web has experienced exponential growth. A recent forecast estimates that by 2005, the web will have 150 million uses worldwide. By any standard, the web is the fastest-growing communication system history has even witnessed.

Here I used HTML (Hyper Text Markup Language) to create my web site. In addition I have used MS Front Page 2000, Macromedia Flash 5.0, Macromedia Dream viewer, MS Excel, MS Power Point and MS Word to design the web site.

By designing this web site I able to have experience in the growing technologies for creating web sites.

Objectives :-

Cause of creating my web page I could to get more objectives. Theo us are: -

-  To use many packages. Such as MS Front Page 2000, Macromedia Flash 5.0, Macromedia Dream viewer, MS Excel, MS Power Point and MS Word so on.
-  To use The Internet for collecting data.
-  Good knowledge about color machine, sound matching and to use the correct images and HTML tags.
-  Could get knowledge that, what are the good qualities about web pages.
