

Enhancing user interface and user experience design of digital banking platforms: a usability-focused approach for senior citizens in Sri Lanka  
*Afraar A.R.M. and Gunewardhana H.M.K.T.* 7

Optimizing Red and White Wine Quality Prediction Using Hybrid Ensemble Learning and Interpretable Feature Engineering  
*Dissanayake D.K.H. and Kumara B.T.G.S.* 8

## SOFTWARE ENGINEERING TRACK

A Hybrid LLM-Driven Recommendation System for Selecting Flutter Packages Using Structured Metadata and Stack Overflow Knowledge  
*Bandara R.M.I.M., Chathumini K.G.L., and Kumara B.T.G.S.* 9

AI-Driven Risk Prediction in Software Development Environment  
*Sanchayan R., Somaweera W.T.S., and Sandaruwan R.M.T.* 10

AI Based Flutter Interface Generator Using Natural Language Commands with Social and Ethical Considerations  
*Andarawewa K.M. and Chathumini K.G.L.* 11

Detecting Developer Burnout Through Sentiment Trends in Software Repositories Using DistilBERT  
*Samaraweera S.P.I.L.D. and Adeeba S.* 12

Semantic Metadata-enhanced Deep Learning Techniques for Duplicate Bug Report Detection  
*Sandunika D.M.N. and Herath G.A.C.A.* 13

Optimizing API and framework design for improved usability, maintainability, and developer productivity  
*Hashan G.T., Somaweera W.T.S. and Sandaruwan R.M.T.* 14

An Empirical Evaluation of Clean Architecture: Impact on Software Quality and Developer Productivity  
*Senadheera M.A.K.R., Somaweera W.T.S. and Sandaruwan R.M.T.* 15

Enhancing software quality and team productivity in agile development environments through machine learning-based sentiment analysis  
*Dayarathna K.O.K.S. and Wasalthilaka W.V.S.K.* 16

Analyzing developer misguidance in AI code suggestion tools: a large-scale empirical study  
*Sathursana K. and Nirubikaa R.* 17
